Tapestry of Care

NARI is collaborating with Royal Freemasons Ltd in the implementation and evaluation of an enhanced model of care for residential aged care.

Based on current best practice, this program places the resident at the centre of their own health and aged care journey, and emphasises the World Health Organisation approach to functioning, disability, and health.

The model is based on a person-centred care approach and focuses on improving relationships, quality of life, and what is important to the resident. Comprehensive pre- and post-program assessments will evaluate the success of the program at two participating aged care facilities.

The project is expected to be completed by the end of 2015.
